

For the TRUCKEE-CARSON FAIR

To be held at
Fallon, Churchill Co., Nev., Sept. 20, 21, 22, 1911

THE SOUTHERN PACIFIC

will sell round trip tickets from all points in Nevada at the rate of one and one-third fare for the round trip. Sale dates, Sept. 19, 20, 21, and 22. Return limit, Sept. 24

"RENO DAY," SEPTEMBER 21

This is the FIRST ANNUAL TRUCKEE-CARSON FAIR and arrangements are being made to make the event a grand success.

Exhibits of livestock, produce, machinery, articles of manufacture, vehicle and automobile display, etc. Many attractions in the way of races and games, broncho busting, shows, dances, etc. Prizes, premiums will be given to all winners.

It is expected that the SUGAR FACTORY will be in operation and may be inspected by the public. The LAHONTAN GOVERNMENT DAM, now being constructed, in which there will be used over 800 carloads of cement, may also be visited. These are the two greatest things that Nevada is now developing and mean great things for the entire state.

COOL WATER IN THE HOT SUN

APPELL'S South African WATER BAG

Keeps water cool 48 hours or longer, in sun or shade: great boon to prospectors, sportsmen, stockmen, farmers, teamsters, anyone exposed to dry or warm weather. Used by U. S. Gov't. Strong, light, easy to carry. Guaranteed.

Take no Substitute—This Letter Typifies the Attitude of All Users

While in Nevada recently I had occasion to drink out of one of your South African Water Bags. Water from the bag certainly tastes good on the desert. We used one of your 25 gallon bags and the water remained cool all day, even though the temperature was over 100 in the shade, and in the morning I found the water sparkling and as cold as ice water. It certainly is a boon to those living in the arid regions.

Yours Sincerely, W. E. VICKER

CAMP OF AURORA BEING REVIVED

OLD CAMP HAS A PROMISING
FUTURE—MUCH EXCITE-
MENT PREVAILS.

The Dickey brothers, who have just returned from a prospecting trip in the vicinity of Aurora, report considerable activity in that old camp. The Tonopah Mines and Exploration company has had an expert examining and sampling the properties in Aurora for the part of the past year, and a force of men has been employed retimbering the shaft on the old Ham-boldt mine. This shaft is 400 feet in depth and has, so far, been retimbered to a depth of 200 feet. It will be continued to a depth of 300 feet. It will be continued to the bottom of the shaft and the shaft will then be dropped down another 200 feet. This shaft is sunk in a ledge 60 feet in width and the entire ledge, estimated by close sampling, will mill in the neighborhood of \$12 per ton in gold. The shaft is drained of water down to the 400-foot level by a tunnel about 600 or 700 feet in length, but when sinking to a lower depth begins the water will have to be pumped upon the level of the drain tunnel.

This property is one of the old ones in the camp, and has produced some millions in bullion. When the mine is in shape it is the intention of the company to erect a 100-ton mill to reduce the ore.

Old Aurora has a record of producing something over \$30,000,000 in gold in early days, and there are no very deep workings in the camp yet, owing to the floods of water encountered at a depth of from 200 to 500 feet. It will surprise no one in this section if the camp again becomes a producer on as large a scale as in former years. All it needs to do this is the unwatering and further development of the properties.

ATTENTION!

A meeting of the Tonopah Nevada Rifle club will be held at the office of the National Realty and Investment company on Thursday evening, September 21, at 7:30 p. m. sharp. Business of importance is to be transacted. By order
J. G. CRUMLEY, Pres.
C. A. RICHARDS, Sec.

PROGRESS AT NEVADA'S NEW BONANZA CAMP

NEW STRIKES BEING MADE OF
PROMISING MERIT—A GOOD
SHOW FOR LEASERS.

A Tonopah man who has followed the boom camps of this state the past three years, was a caller at the Fallon Eagle office last week, having spent several days at the new camp of Terrell. He says it cannot fail to make a good camp, if they will let it alone so the camp can prove its own worth. The camp has a wide range, he says, ore having been developed for a radius of three miles. It is what he calls a poor man's camp, because there is every opportunity for leasers.

It is stated that the flow of water in the Wingfield shaft is 1000 gallons per hour, which insures an abundance of water for milling purposes.

A correspondent of the Reno Journal gives the following story on Camp Terrell:

What is believed by many to be the most important strike yet made in the Terrell district, is the one made last week by Fred Martini, a restaurant man, who, while prospecting the hills about one mile south of town, uncovered a ledge of shipping ore on the main contract. The find has added new life to the camp and confidence in the merits of the district is stronger than ever. Mr. Martini has let a lease to Shaffer and Channing of Rawhide on 700 feet of the ledge and these practical mining men have begun operations on quite a large scale and will begin sacking ore at once.

Two other important finds were made last Thursday, one by Jim Jewell, who while doing location work for John Gullings, Harry Merigold and other Fallontes extensively interested at Terrell, uncovered what looks like a ledge that would develop into a shipping mine.

At what is known as the company's water shaft, crosscutting from the 107-foot level has been progressing with two shifts and 90 feet out in the south crosscut the night shift broke into the black formation which encases the vein where it crops out on the surface, and which always carries values. The Thomas 100-foot contract at the No. 2 shaft, one and a half miles west of the camp, is about completed, and crosscutting into the hanging-wall to cut the rich ledge found on the surface will begin.

People are coming into camp every day and securing business lots on the main streets of Terrell townsite, which are selling at a nominal figure. Two restaurants, a store, a lodging house of 20 rooms and two saloons are already established on the ground and several other business enterprises have secured locations. The townsite company's well is being rapidly pushed down toward the water strata, which is likely to be encountered any shift now. The road between Fallon and Terrell has been put in first-class condition, so that the stage, which makes tri-weekly trips, covers the 29 miles in about six hours.

PLUTE INDIANS HOLD BIG FAIR AT WADSWORTH

One of the most novel affairs ever given in any section was that given by the Plute Indians of the Pyramid Lake Indian reservation at Wadsworth on the 1st and 2d inst. The fair consisted of an exhibition of Indian products and was participated in with enthusiasm by practically all the Indians on the reservation. The exhibition was a surprising one as the corn, pumpkins, squash, melons, horses and cattle were such as to compare favorably with any farm community. Prizes were given in the various departments and the winners were the happiest Indians in the world.

WM. PORTERFIELD CASE DISMISSED

The reading and signing of the testimony in the case of William Porterfield, charged with complicity in the robbery of the Mammoth National mine on the night of August 29, was completed in Judge Dunn's court at 10 o'clock on Thursday evening.

When the last deposition had been read and signed, Judge Dunn stated that he had carefully considered the testimony and found nothing that would warrant him in holding the defendant to the grand jury. Porterfield accordingly left the court room a free man.—Silver State.
